April 22, 2015

Dear Supplier

As you are likely aware, FMC Corporation entered into a definitive agreement last year to acquire Cheminova A/S, a premier crop protection company headquartered in Denmark. We received all necessary regulatory approvals and closed the acquisition on April 21, 2015. All of us at FMC and Cheminova are excited about the many opportunities this combination will bring to customers and partners around the world.

We anticipate minimal impact on external partners immediately after the close. As integration work begins, we will better understand the future structure of our company and how new or different processes could impact how you do business with FMC. Integrating Cheminova into FMC is expected to take up to two years. Of course, we will keep you informed about our progress and will contact you well in advance of changes that could affect vendors or partners.

We value our partnership with you and look forward to potential new opportunities in the future. We believe FMC and Cheminova are better together and will lead to growth and potential new opportunities for our partners. In the meantime, business stability, customer service and safe operations are among our highest priorities during the integration.

Your current FMC or Cheminova contacts and processes are expected to remain the same in the short-term. We want to make working with the new combined company as seamless as possible throughout the transition. Furthermore, we are committed to keeping you informed throughout this process. To learn more about the FMC Corporation, you can access FMC's website at www.fmc.com as a resource for the latest news and updates about the acquisition. Supplier News and our purchasing values can be accessed directly online at [FMC Suppliers](#).

Please contact your FMC or Cheminova representative if you have any questions throughout this process.

We appreciate your partnership and look forward to sharing more information in the future.

Sincerely,

Karen Totland
