# STEWADING A PIPELINE OF NEW TECHNOLOGIES

For more than a century, growers around the world have looked to FMC for industry leading and sustainable crop protection solutions. Growers depend on advanced technologies to protect their crops from pests including diseases, weeds and insects.

FMC has one of the most productive and diversified pipelines in the industry. With a bias toward new modes of action, we are bringing to market innovative solutions in biological and synthetic weed, insect and disease control. Over the next 10 years, we anticipate the launch and market expansion of four new compounds including: fluindapyr, Isoflex™ active, Dodhylex™ active and rimisoxafen, pending regulatory decisions. Additionally, we expect to launch our first pheromone products in 2025. To learn more, please visit [FMC.com](https://www.fmc.com).
